

Suitable for up to 14kw heating load compact lightweight thermostatic mixing control complete with Yonos Para pump. The unit has been designed for direct connection to heating manifolds with 210mm manifold bar dimensions and is supplied fully assembled in left hand format with G1" swivel nuts with O rings as standard.

Its versatile design and O ring connection system allows simple and quick conversion to Right handed format if required.

Installing the control pack to the manifold is simple and quick, requires no additional support bracket.

Thermostatic Valve	
Dial Setting	Temperature
Minimum	30°c
1	34°c
2	38°c
3	41°c
4	43°c
5	45°c
6	47°c
7	50°c
8	54°c
Max	60°c
