## Why Firmopress Plumbing?

### Firmopress brings together a wealth of knowledge and industry insight.

We offer the best plumbing solutions for both domestic and commercial applications from 16mm to 75mm pipe sizes, along with high quality brass metal press fittings and an array of bevelling, cutting and press tools to complete the range.

You can feel secure that your system specification, design and installation (if required) are in the hands of experienced professionals.

We pride ourselves in selecting premium products and it goes without saying that all our systems carry extensive product guarantees and certification.

The range is comprehensively stocked in a central warehouse ensuring quick, efficient turnaround on orders placed with us. Our experienced team is on hand to provide all the information you will need from conception to commissioning.

**Contact us today to discuss your project and see how we can help.**

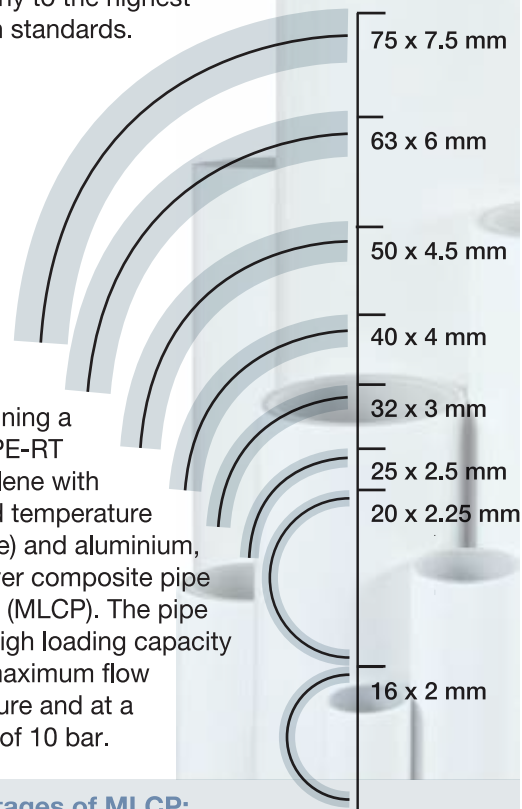

## Pipe Range

The core of the Firmopress plumbing system is the multilayer pipe (MLCP) manufactured in Germany to the highest European standards.

By combining a modern PE-RT (polyethylene with increased temperature resistance) and aluminium, a multilayer composite pipe is formed (MLCP). The pipe offers a high loading capacity at 95°C maximum flow temperature and at a pressure of 10 bar.

### Advantages of MLCP:

- 100% oxygen tight
- Low heat expansion
- Form stability
- No corrosion or deposits
- Reduced theft risk on site (no scrap value)
- Form stability (reducing amount of fittings used)
- Easy and quick installation
- No hot work certificates or regulations required
- 100% recyclable

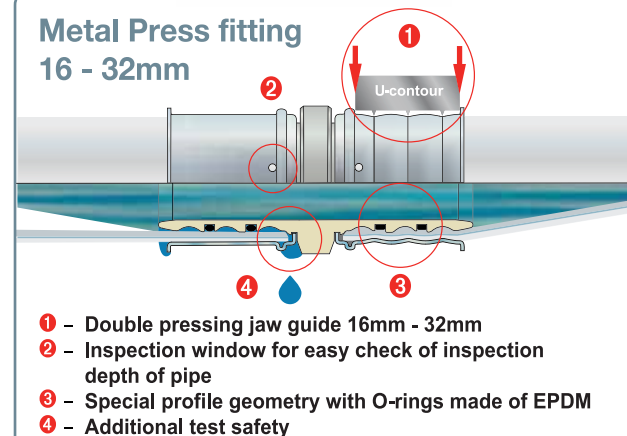

## Fittings Range

Our high quality brass metal fittings to suit pipe sizes 16mm to 75mm.

### Metal Press fitting 16 - 32mm

### Metal Press fitting 40 - 75mm
